Dear Sirs:I respectfully urge the FCC to REJECT NAB's petition 04-160 and allow xm radion to continue providing the kind of programming they are currently providing. The weather and traffic reports are especially helpful for my husband and I as we travel across the country with our jobs. This is a service we pay for each month and do not feel like the NAB should be permitted to regulate what we hear and pay for.
Sincerely,
Thelma M. Friedmann
